Summer Training

Skill Development Program | C++, Data Structures, Algorithms, Problem Solving **June 2025 - Jul 2025**

- Completed a certified training program organized by the Center for Professional Enhancement, focusing on strengthening programming and analytical abilities.
- Gained practical exposure to applying logical reasoning, problem-solving strategies, and structured programming approaches.
- Worked on creating optimized algorithms and learning fundamental data structures used in real-world applications.
- Enhanced ability to break down problems, design efficient solutions, and apply programming concepts effectively.

Projects

Secure E-Voting System | *Blockchain – Inspired, Security & Verification Based System* **Jul 2025 - Aug 2025**

- Designed and created a safe online voting system based on blockchain principle to guarantee data integrity, transparency, and confidence throughout voting process.
- Used hash-chained records and Markle Tree – based verification to implement voter authentication and stop duplicate voting.
- To improve system dependability and transparency, real-time vote validation and live result visualization included.
- Repository Link: **https://github.com/Abhay9889/E-Voting-System-Project-**

E-Governance Chatbot | *Python, Flask, Machine Learning, NLP* **April 2025 - May 2025**

- Created an intelligent chatbot system to reduce manual labor and increase service transparency by automating frequently asked public questions about e-governance services.
- Using a structured JSON-based knowledge base, supervised learning was integrated with flask to provide context - aware and dynamic replies.
- Used HTML, CSS, and a Python backend, a straightforward and user-friendly web interface was created, allowing users to swiftly and effectively access information.
- Repository Link: **https://github.com/Abhay9889/Chatbot-for-E-Governance_Abhy**

Certificates / Certifications

Java (Basic) **June 2025**
HackerRank— https://www.hackerrank.com/skills-verification/java_basic

July 2025
Coursera — https://coursera.org/verify/ODX89Y9G5KNI

Skills

Languages: C/C++, DSA, Python, Kotlin

Technologies/Frameworks: XML, CSS, Git, GitHub, Ubuntu

Domain Skills: Data Structures and Algorithms, Problem-Solving, App Development

Education

Lovely Professional University **2023 – 2027**
Bachelor of Technology - Computer Science and Engineering CGPA 6.7 *Phagwara, Punjab*

Tulsi Intermediate Collage **2022 – 2023**
12th — Percentage:80% *Pratapgarh, Uttar Pradesh*
